

CONNECTED SERVICES

NO ADDED HARDWARE, NO ADDED FUSS

Connected Services uses intelligent connectivity to provide Scania customers with data on key metrics, helping you to add value to your operations.

From lowering fuel consumption to reducing wear and identifying maintenance needs, to automating tedious administrative work.

With over 550,000 Connected Scania's worldwide, we focus on the data, so you can remain focused on the road ahead.

CONTROL PACKAGE

The control package is an advanced set of services, connecting vehicles and drivers directly to their office and helping fleet managers to run their operations efficiently.

By utilising the data provided to influence changes, you can drive the productivity of your fleet and have full control over your operation.

Data can be accessed via an app or website. View the information live and download reports for further analysis.

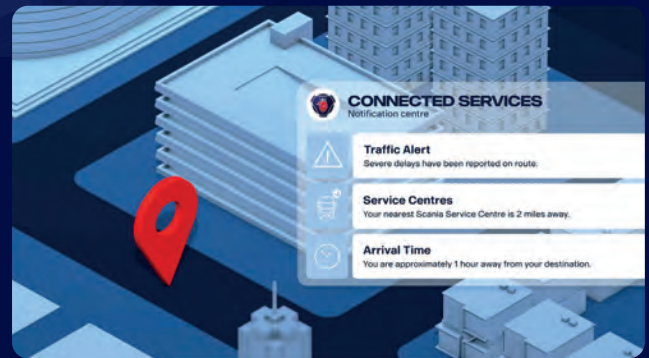

SCANIA

CONTROL PACKAGE

NO ADDED HARDWARE, NO ADDED FUSS

FLEET POSITION

- Choice of updates, with up to 1-minute position updates
- Track & trace with historic tracking
- Accumulated driving times
- Driver history plus an overview of working activities
- Statuses with warnings for faults and maintenance alerts
- Geofencing with up to 250 zones for alerts or notifications, with reporting to show proof of on-time deliveries
- Available separately or as part of the Control Package www.scania.co.uk/fleet-position

DRIVER EVALUATION

- Identify drivers with greatest potential for improvement
- Grading from A-E on core parameters: Idling, Cruise Control, Coasting, Speeding & Anticipation
- Tips for improvement and a tool for follow up
- Put your Drivers in control with the Scania Fleet App and view grades remotely
- Exportable, actionable data, ready for extended analysis
- Available separately or part of the Control Package www.scania.co.uk/driver-evaluation

VEHICLE PERFORMANCE

- Custom reports, with over 90+ parameters of data
- Environmental report, displaying CO₂, NO_x, HC, CO & PM
- Customise emission specifications for alternative fuels (HVO & FAME)
- Fuel and reductant refuelling events, from location to driver: Complete transparency, complete control
- Vehicle comparisons to spot deviations and trends, graphically and numerically
- Available separately or part of the Control Package www.scania.co.uk/vehicle-performance
